

## **Air Tightness Solutions Summary of amendments to Risk Assessments and Method Statements for COVID-19**

Date: 13.04.2020

Specific guidance has been issued to all Air Tightness Solutions personnel relating to COVID -19. On site technicians will strictly adhere to the following guidance:

- All on site activities by technicians are to comply fully with Government guidance relating to COVID-19 pandemic.
- All staff will inform the Managing Director immediately should they be displaying any of the symptoms that require self-isolation.
- All on site works are pre planned with the client before arrival to mitigate the need to discuss requirements on site.
- Only one employee is permitted to use a company vehicle.
- Additions to Personal Protective Equipment to include hand sanitiser and face mask.
- 2m distance between other trades is required, with pre-determined test areas free from other trades.
- Use of on-site welfare facilities such as smoking area and canteen to be reduced to a minimum.
- Strictly avoid touching eyes, nose and mouth when on site.
